

Celebrating the delivery of Kiln 3 Rebuilding Project

Alba celebrated its most recent milestone, which was achieved with the completion of the Kiln 3 Rebuilding Project safely and in time, with a special gathering held beside Carbon 1 & 2's Kiln 3 and attended by Acting COO Amin Sultan, Director Line 6 Smelter Project and Engineering Shawqi Al Hashmi, Director Carbon & Services Hassan Noor and other top officials as well as a group of employees and contractors' workers.

This new milestone, which comes as part of Alba's commitment towards bolstering its credentials as an efficient aluminium producer, consumed over 325,000 man-hour of hard-work and was accomplished without any single lost time injury (LTI).

Commenting on this new milestone, Acting COO Amin Sultan stated: "We, at Alba, are keen to carry such major upgrades and refurbishments that bring lots of enhancements which save costs as well as increase operational efficiency. This project was an excellent model of successful project due to the team work and alignment between contractors and Alba Team.

I would like to thank all of the teams who have accomplished this new milestone, and urge all of the employees to sustain the hard-working momentum."

Adding further, Director Line 6 Smelter Project and Engineering Shawqi Al Hashmi said:

"Such projects are crucial for boosting our operational efficiency. We, as Engineering Team, will continue our endeavours to push the limits and improve operational performance by working closely with all Sections and Departments and equipping Alba with the latest state-of-art technologies."

**With Best Regards,
Alba Management**
